

Working Student - TW

Are you enthusiastic to work in a rapidly growing and ambitious international scale-up that plays an important part in the energy transition? If you're currently pursuing a bachelor's or master's degree in a technical field and looking for a rewarding opportunity to gain practical (design) engineering experience alongside your studies, join TWD as a working student!

Foundations of Your Job

As a working student at TWD, you will collaborate with our international team of Engineers and Designers, assisting in the design (concepts for) structural and mechanical installation tools for a diverse range of on- and offshore client projects. Throughout the project lifecycle, from concept to detail, you'll actively participate alongside the project team. Your tasks may vary, encompassing hand calculations, sketches, designing connections for steel structures, and performing 2D and 3D drawings.

What Makes You Great

You are a passionate, quick learner with a strong technical insight. With using your enthusiasm and experience as a problem-solver, you come up with ingenious solutions. Being self-driven, responsible, and committed, you ensure that the job gets done.

You are the perfect match for TWD if you also have the following skills and experience:

- Bachelor's or master's degree in a technical field, including but not limited to:
 - Mechanical Engineering
 - Mechatronics Engineering
 - Civil Engineering
 - Aerospace Engineering
 - Marine/Vessel Engineering
- We are looking for students who have a solid foundation in:
 - Statics, Dynamics, Mechanics of Materials
 - Engineering Graphics (technical drawing/CAD)
 - Machine Design Theory
 - Mechanism Design
- You are seeking a side job for 3-4 days per week (during the first month, we highly recommend you to be available 4-5 days per week to quickly get up to speed).

TWD – A Fun Challenge to Be Part Of

At TWD, we love to create construction methods and design installation equipment. We achieve creative, simple, and efficient solutions through dedicated teamwork. Thanks to our core values – Fun, Development, and Happy Clients – we grow at a rapid pace with over 300 talented people in five locations: Rotterdam, London, Athens, Taipei, and Perth.

Every day we contribute to the energy transition and key infrastructure projects worldwide. We do this by offering innovative design solutions to our clients, mainly in the offshore wind and heavy civils industry.
